### Higashiyamato Park

**Location**
Kohan 3-chome, Takagi 1-chome, Sayama 3-chome, Higashi-Yamato City

**Contact Information**
Sayama Park Administration Office  tel: 042-393-0154 (3-17-19 Tamako-cho, Higashi-Murayama-shi 189-0026)

**Transport**
15-minute walk from Musashi-Yamato (Seibu-Tamako line)
5-minute walk from Nangai bus stop on Seibu Bus (Tachikawa, JR line to Higashi-Murayama, Seibu line)

**Opened**
June 1, 1979

**Area**
164,143.10 m²

**Main plants**
Japanese red pine, storax, sawtooth oak, konara oak, quadricolor hydrangea, hiryu azalea, dogtooth violet

**Tennis court enjoyed by young and old**

The park is great for picnics. It rivals neighboring Sayama Park and Tama Lake for that popular activity.

**Opened**
June 1, 1986

**Area**
98,719.71 m²

**Main plants**
Storax, sawtooth oak, konara oak, cherry (someiyoshino, weeping cherry), quadricolor hydrangea

**Facilities**
Tennis courts, baseball field, exercise field, stream, gateball court, pool, gymnasium (administered by Higashiyamato City: tel: 042-566-3531)

**Exercise facilities**
In addition to a fee-based tennis court and baseball field, there is an exercise facility with 400-meter track for field sports and gateball. The Higashiyamato city gymnasium and pool are also on the park grounds. A stream where children can play in the water is open in the summer.

**Baseball field redevelopment in February 2005**

This athletic park was developed from part of the former US military Yamato Base. Inside the park is the powerplant for the former Hitachi Aircraft Tachikawa Plant, a Higashiyamato City cultural asset. One can also observe the new greenery and flowers as well as fruit and autumn colored leaves of 120 kinds of trees.

**Preserving nature**
The region has been designated a regular area under the Law for the Conservation of Green Belts around the National Capital Region. It is also a Higashiyamato City nature preserve. Those and other measures ensure the protection of nature in the Sayama hills.

**Exercise facilities**

This building in the park is a historical war-damaged building (powerplant for the former Hitachi Aircraft Tachikawa Plant), designated a Higashiyamato City cultural asset. The numerous holes in the walls are from machinegun strafing by fighters and bombing during World War II.

**Tree groves**
Groves of trees grow around the exercise field. The new greenery of spring and colored leaves of autumn are particularly beautiful, and lots of acorns can be found around them. Cicadas sing here in the summer, and stag beetles and golden scarab beetle can be seen. Many wild birds such as bulbuls, great tits, and long-tailed tits also inhabit the park.

**Path where the chirps of birds can be heard**
